

Water Bottle Filling Stations

Currently there are four water bottle filling stations located in the Upper Township Middle School. Installation of the stations provides students and staff access to clean, filtered, drinking water.

Locations:

- 8th Grade hallway
- 7th Grade hallway
- 6th Grade hallway
- Gym hallway

Since installing the water bottle filling stations in 2017, over 9,300 plastic bottles have been saved from our landfills. Statistics have shown that only 20% of water bottles are recycled. Plastic bottles take petroleum to make and gas to transport; by promoting the filling stations, we help to minimize our carbon footprint.
