

## **Water Bottle Filling Stations**

Currently there are four water bottle filling stations located in the Upper Township Middle School. Installation of the stations provides students and staff access to clean, filtered, drinking water.

### Locations:

- 8<sup>th</sup> Grade hallway
- 7<sup>th</sup> Grade hallway
- 6<sup>th</sup> Grade hallway
- Gym hallway

Since installing the water bottle filling stations in 2017, over 9,300 plastic bottles have been saved from our landfills. Statistics have shown that only 20% of water bottles are recycled. Plastic bottles take petroleum to make and gas to transport; by promoting the filling stations, we help to minimize our carbon footprint.
